WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

Slight Chance of Late Day Thunderstorms near OR State Line Today

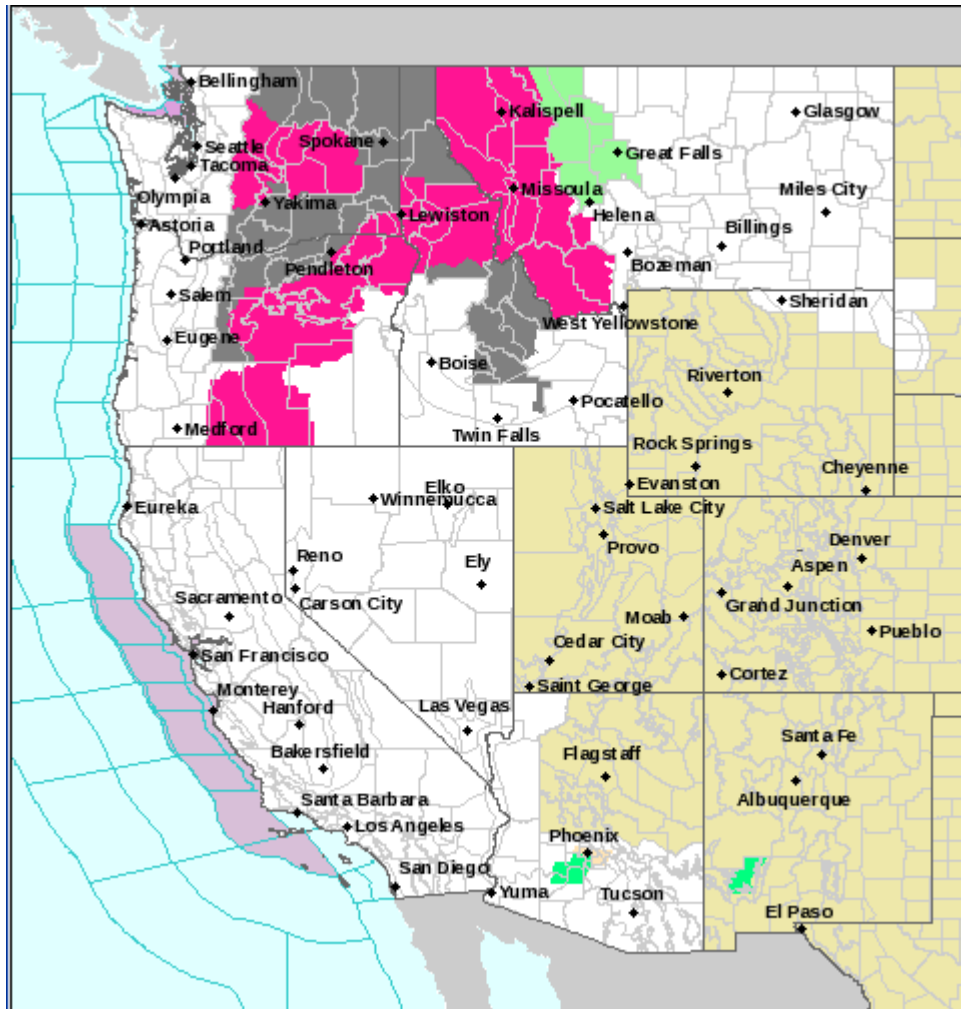

Drier with a Increasing SW-W Wind Higher Terrain and Cascade-Sierra Crest-East Next Few Days will Increase Chance of Activating Holdover Fires, Especially Tomorrow

Siskiyou County still has a slight chance of isolated afternoon activity today. Any storms are likely to produce locally heavy rain and some hail. Modoc County will also have a slight chance of showers or thunderstorms. The low causing all the thunderstorm activity in recent days is moving off to the E and NE as SW-W flow increases over the region in response to a stronger incoming low pressure system. The increase in sunshine and wind and the expected lower relative humidity (RH) will allow holdover fires from recent lightning to emerge and begin to spread, especially tomorrow. Afternoon winds over the higher terrain and in all areas east of the Cascade-Sierra crest will gust to around 25 mph with minimum RH 15-25% today, with gusts increasing to 30 mph with similar RH tomorrow. Lighter winds out of the NW-N are expected Monday, but on Tuesday winds will gust to 25 mph or so out of the SW-W again as dry conditions continue.

SOUTHERN CALIFORNIA

Shower and thunderstorm activity will only occur only near the Colorado River today before ending entirely tomorrow. Temperatures will remain near to a little above normal through this weekend as a trough sits over Northern California and high pressure remains off the Northern Baja Coast. Maximum temperatures will be in the 80s to low 90s across the mountains and 90s to 102 in the valleys. Westerly afternoon winds of 15 to 25 mph with gusts to 40 mph will surface across the desert passes through this weekend. The Pacific trough over Northern California will drop south early next week bringing a little below normal temperatures to the area through Wednesday. This trough will also cause westerly winds to increase to 20 to 30 mph with gusts to 50 mph across the wind prone mountain and desert areas early next week. Minimum humidity will be mainly between 15% and 30% above and inland from the marine layer through the middle of next week. The trough will move off to the east and high pressure over Baja will strengthen bringing near to a little above normal temperatures to the region once again late next week.

Cal OES LAW ENFORCEMENT MISSIONS

Ongoing Cal OES Law Missions

- **2017-LAW-37928, 08/08/17**, At approximately 1600 hours, Cal OES Law Duty Officer (LDO) made contact with the California Air National Guard on behalf of the Fresno County Sheriff's Office. The contact regarded a recovery mission which has been on-going for approximately one week. Two Individuals were involved in a fatal vehicle accident on HWY 180 approximately 500' into a river gorge on the Upper Kings River. The rugged terrain and high waters are hindering recovery efforts and therefore consultation from the National Guard was being sought for potential assistance. The National Guard and their subject matter experts will be meeting in Fresno and then performing a reconnaissance flight to the site for evaluation. **UPDATE: 8/09/17, 2100 hours**, The National Guard reported that they were unable to satisfactorily evaluate the recovery mission with the Blackhawk Helicopter they arrived in and will re-engage on 08/10/17 with a Chinook Helicopter. **UPDATE: 8/10/2017, 1400 hours**, CNG's consultation continuing. **Mission Ongoing.**
